

# YOUR PARTNER IN **INDUSTRIAL AUTOMATION**

At Cleanwater1, we believe in providing comprehensive solutions that power your business forward. That's why we've expanded our capabilities to bring you a full suite of advanced automation and engineering services, all designed to enhance your operations and drive efficiency. Partner with us for reliable, high-quality solutions that get the job done right.

CLEAN WATER, CLEAR CHOICE

# Our Comprehensive Services

## Custom Control Panels

We design, assemble, and certify custom control panels to meet your precise specifications. Our panels are built to UL508A standards and feature limitless capability that integrate seamlessly with your existing infrastructure. We also offer Master Control Center (MCC) services, providing complete solutions from design to assembly.

## PLC Programming

Our engineers are proficient in programming a wide range of Programmable Logic Controllers (PLCs), including Allen-Bradley and Siemens. We develop robust and reliable control logic to automate your industrial processes, ensuring maximum efficiency and productivity.

## Operator Interface Systems

Gain a clear, comprehensive view of your operations with our intuitive HMI & SCADA systems. Our solutions provide real-time monitoring and centralized control, enabling you to manage and optimize complex processes while enhancing safety through critical alarms and information.

## Integrated Automation & Instrumentation

We specialize in integrating a wide array of instrumentation and sensors into your control systems. This allows for precise data collection and monitoring of critical process variables like temperature, pressure, flow, and more. Our solutions are designed to automate and optimize your factory and process lines, reducing human error and improving safety.

## Vision Inspection Systems

Enhance quality control and process efficiency with our advanced vision inspection equipment. We program and integrate these systems to perform high-speed automated inspections, detecting defects and ensuring product consistency with precision.

## Certified Panel Shop

Our facility is a certified control panel shop, guaranteeing the highest standards of quality and safety.

We hold certifications for:

 **UL508A & cUL:** Industrial Control Panels.

 **Hazardous Locations:** Intrinsically safe and explosion-proof control panels.
